

GARDEN WASTE REMOVAL

Overview

Safesite Facilities clears garden waste fast. Our service includes the removal and disposal of all sorts of garden waste including branches, leaves, shrubs, twigs, pot plants, lawn clippings and general rubbish. We even sweep/rake up before we go.

Keeping the garden tidy and in good order you can easily prevent squatters from becoming a problem.

A garden is one of the first signs of neglect, and if a house is unoccupied you can often tell by how the garden looks.

Keep it tidy by taking advantage of a simple tidying service that we can arrange, and reduce the risk of squatters, thieves and vandals.

This is particularly useful for larger buildings such as factories which are not in use. Following a property clearance, we can arrange for on-site security which is the ultimate deterrent for anyone with an unhealthy interest in the property.
